

Vehicle charge communication unit

Cost-efficient solution for battery-electric commercial vehicles

Powertrain and electrified mobility

- Versatile variants for regional and customer-specific requirements
- State-of-the-art software and hardware solutions for all charging standards
- Proven charging solutions for cybersecurity and functional safety in accordance with ISO 26262 and up to ASIL B
- Cost-effective control unit for charging communication that can be deployed with great flexibility

State-of-the-art

Modular platform with flexible and customizable hardware and software concept

Cost-efficient

Software and hardware solutions for all charging standards in one compact control unit
