BOSCH

Vehicle health services

Transparency about the vehicle status for the entire fleet

**Powertrain** and **electrified** mobility

Permanent
transparency

of the data-based vehicle status across the entire fleet

Optimized
operating costs

due to time- and cost-optimized planning and execution of maintenance tasks

- Tailored portfolio of data-based services that support fleet operators in raising the utilization and profitability of their fleet in a sustainable manner
- Transparent health status for every single fleet vehicle, independent of time, location, vehicle segment, and manufacturer
- Time- and cost-optimized planning and execution of maintenance tasks thanks to data-based services
- Prevention of failures thanks to anomaly detection and early warnings
- Optimized availability and reliability of the fleet vehicles
